## INNOVATION GEARBOX TECHNOLOGY

### 3K WOVEN CARBON TECHNOLOGY

Hand crafted using only the best materials. Paddle features 100% Composite Graphite construction with a 3k woven carbon outer surface reinforced with four plies of unidirectional carbon fiber on the hitting surface for extreme durability and strength.

### SUPERIOR CONSTRUCTION

Advanced single piece construction provides maximum strength and durability. Optimum internal foam density provides the ultimate energy return to the ball, allowing for optimum ball speed and amazing control.

### LIGHT WEIGHT FOR MAXIMIZED MANUEVERABILITY

Lightest in its category! Lighter weight allows for increased swing speed and overall paddle quickness, giving the player more shot making options. Paddle is very easy on your arm, making it more enjoyable for cross sport players.

### HYBRID TEARDROP SHAPE

Revolutionary shape creates more Frame Stability and enlarges the "Sweet Spot", allowing for more forgiving shots, control and power.

### USER FRIENDLY HANDLE

Handle is ergonomically engineered and contoured to fit the hand for best control and comfort. Handle can be made into larger size, if desired.

### GB PADDLE COLLECTION INCLUDES

Two weight options available - 300g / 10.7oz and 325g / 11.6oz. Select your ideal paddle weight to maximize your game!
